

PROFESSOR UNI

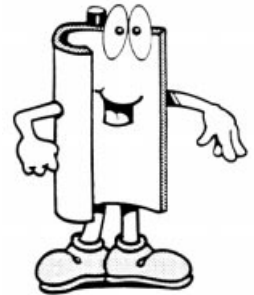

"Vertical D.E. grids look pretty simple. Is there anything specific to be alert for?"

There are two basic designs of "curved" vertical D.E. grids – the slotted collar type used by Pac Fab, American, Hayward and Sta-Rite and the notched collar style used in Purex and Swimrite/Premier Atlas filters.

The good news is all four slotted grids, i.e. Pac Fab, American, Hayward, and Sta-Rite, are interchangeable (assuming full size grids are replaced with full size and small grids with smalls). Unicel offers one all-purpose replacement series.

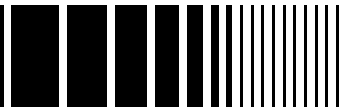

The bad news is the two notched types are not interchangeable. Interchanging Purex and Swimrite/Premier Atlas grids in their respective tanks can cause D.E. to bleed directly into the pool. Purex grids are shorter in length than their Atlas cousins and, if put in an Atlas tank, can pop loose from the manifold during the backwash cycle. Once unseated, D.E. will pass directly into the pool when the valve is returned to the filter mode. Unicel offers two replacement series for notched collar grids.

If in doubt, measure the grid from the notch to the opposite end. Call your supply dist. rep. for assistance.

Unicel Vertical D.E. Filter Grids

Unicel P/N	Filter Area (sq. ft.)	Grid Length	Filter	OEM Part Number	Price
AMERICAN PRODUCTS "TITAN"					
FG-1002	24	12"		590011 full grid	16.94
PG-1902				590010 partial grid	17.42
FG-1003	36	18"		590018 full grid	22.70
PG-1903				590017 partial grid	22.94
FG-1004	48	24"		590024 full grid	28.44
PG-1904				590023 partial grid	28.88
FG-1005	60	30"		590030 full grid	35.54
PG-1905				590029 partial grid	34.66
